8. EXPOSURE STANDARDS AND PERSONAL PROTECTION

EXPOSURE STANDARDS

Chemical component	TWA		STEL		Notices
	PPM	mg/m ³	PPM	mg/m ³	
Butane	800	1900	-	-	
Ethanolamine	3	75	6	15	

mg/m³ = milligrams per cubic meter

PPM = Parts per Million

As Published by Safe Work Australia (SWA). A list of current Australian Exposure Standards is available on the Hazardous Chemical Information System (HCIS), which can be accessed from www.safeworkaustralia.gov.au

TWA = Time Weighted Average
The average airborne concentration over an eight-hour working day, for a five-day working week over an entire working life.

STEL = Short term Exposure Limit
The average airborne concentration over a 15 minute period which should not be exceeded at any time during a normal eight-hour workday.

These Exposure Standards are guides to be used in the control of occupational health hazards. All atmospheric contamination should be kept too as low a level as is workable. These exposure standards should not be used as fine dividing lines between safe and dangerous concentrations of chemicals. They are not a measure of relative toxicity.

If the directions for use on the product label are followed, exposure of individuals using the product should not exceed the above standard.

Biological Limit Values
No Biological limit allocated

Engineering Controls
Handle with good industrial hygiene and safe work practices
Ensure ventilation is adequate to maintain air concentrations below Exposure Standards using engineering controls if necessary.
Use only in well ventilated areas.
Use with local exhaust ventilation (LEV) or while wearing appropriate respirator. Prevent vapour concentration in hollows or sumps. Do not enter confined spaces where vapour may have collected.

INDIVIDUAL PROTECTION MEASURES

Avoid bodily contact with product. Do not inhale or ingest.

Wash hands prior to eating, drinking or smoking.

Wash contaminated clothing and protective equipment before storing or re-using

Eye and Face Protection
Safety Glasses with side shields

Skin Protection
Overalls and/ or other removable protective clothing is recommended.
Handle with gloves. Gloves must be inspected prior to use. Nitrile rubber gloves are suitable for intermittent product handling.
Dispose of contaminated gloves after use in accordance with applicable laws and good workplace practices.
Wash and dry hands

Respiratory Protection
Where risk assessment shows respiratory protection is appropriate, a mask marked as conforming to the AS/NZ 1716 standard *Respiratory Protective Devices* is required. Respiratory equipment should be used in reference to AN/NZ 1715 standard *Selection, Use and Maintenance of Respiratory Protective Equipment*.

Thermal Hazards
Standard Personal Protective Equipment required for the safe handling of this product should not adversely increase the thermal load of the wearer.
