

MECHANICAL SUSPENSIONS

MECHANICAL SUSPENSIONS

Engineered for Every Road Ahead

Mechanical suspensions function as durable support systems for your trailers, designed to withstand every condition encountered on your journey.

The Support You Need

You may be curious about mechanical suspensions. They're the robust support system beneath your trailer, guaranteeing stability, dependability, and reduced maintenance challenges.

Unrivalled Stability, Unmatched Versatility

When it comes to stability, reliability, and low maintenance, MAXUS Mechanical Suspensions are the gold standard. With high oscillation that keeps your tyres firmly planted on the ground, these mechanical suspensions offer added stability whether you're on sealed roads or tackling rugged off-road terrain.

Easy Maintenance, Aussie Tough

Our mechanical suspensions feature tapered rubber bushes, streamlining maintenance and ensuring accurate re-alignment whenever you need it. Designed in Australia by the experienced team at MaxiPARTS, you can trust that these suspensions are built tough to tackle the harshest Aussie conditions.

Versatility That Moves with You

From road trains to flat tops and tippers to trailers with drawbar capabilities, MAXUS Mechanical Suspensions have got you covered. With the ability to be used in both square and round axle combinations.

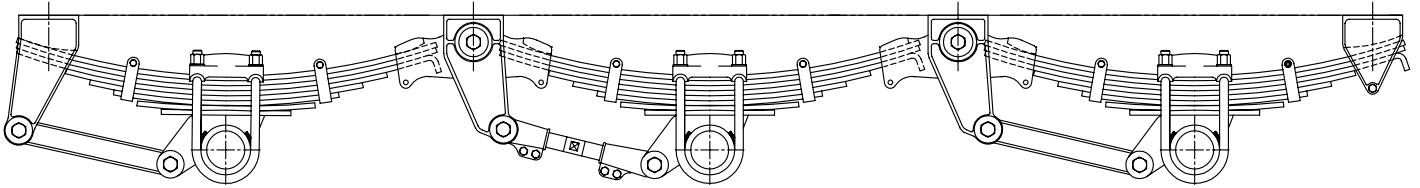

Engineered for Every Load

You can hit the road with confidence because when it comes to keeping your trailers on the road, MaxiPARTS has got you covered. With branches located Australia-wide and a comprehensive range of parts available, MaxiPARTS will keep you moving.
